

# NTP Software QFS® Family of Products

“QFS provides a unique and unified management infrastructure. One easy-to-use interface that manages all storage resources regardless of platforms and geography. Network administrators will find it easy to develop and enforce sound storage management policies using the QFS Family of Products.”

~ ENT Magazine

## Product Overview

### **Maintain Control of Your Most Expensive Resource**

Disk space is your server's most expensive subsystem. Control how much your users consume, manage what they put on your servers, and get real-time data on storage performance and load. NTP Software QFS enables you to enforce appropriate usage policies so that you can preserve system performance and availability for everyone.

## Product Benefits

### **Save Time and Money on Administration**

NTP Software QFS polices itself: Users are notified as they near their limits, file system contamination is prevented automatically, and temporary storage areas maintain themselves.

### **Increase Security**

Create the proper mix of centralized and decentralized network management to reduce logistical headaches by entrusting regional and departmental administrators to manage their allotted piece of the network without compromising overall security. Control the amount of access that specific users and administrators have over various container levels, and designate policies that cannot be overridden.

## Take Control Of Your Storage

### Key Benefits

- Controls quantity and content of files with user-based policies
- Improves end-user experience by automatically communicating and enforcing storage policies
- Drives down TCO while ensuring compliance

### Key Features

- Control thousands of users with one set of policies across all your storage platforms
- Robust and configurable storage management infrastructure
- Fully integrated with LDAP, Notes, Active Directory, and Exchange

The worldwide leader in the control and management of unstructured data

## Benefits (continued)

### Keep Tabs on Volume Utilization

NTP Software QFS allows you to set quotas relative to volume size and automatically notifies you if thresholds are violated. This feature ensures that you will always be aware of potential trouble spots that cannot be overridden.

### Real-Time Storage Monitoring and Controlling

NTP Software QFS allows administrators to monitor or control their highly available and highly expensive enterprise storage in real-time, decreasing the risk of abuse and the storage outage that might occur from such abuse.

**“NTP Software QFS is the Storage Management solution we needed and more. The integrated suite of products makes it a perfect fit for our network.”**

~ AIM Healthcare Services

## About NTP Software

NTP Software is the worldwide leader in the management and control on unstructured data. We create platform-independent products that enable companies to automatically control the compliance, access, quotas, and lifespan of their users' stored files. NTP Software solutions also gather the analysis and planning data necessary for both short-term and long-term decision making, providing everything necessary to actively control all aspects of a user's interaction with local and shared storage.

## Contact NTP Software

NTP Software  
20A Northwest Blvd. #136

## Features (continued)

### Quotas and File Screening

- Quotas by user, group, disk object, share, etc.
- Block creation, modification, or usage of specific file types
- Set designated exclusion groups

### Live Real-Time System Reporting

- Disk and file performance
- By user, quota, status, and much more

### Ease of Use

- No reboot required
- Compatible with all file systems and clusters
- Scalable across desktops and servers
- Push install to new servers

### End User Support Infrastructure™ Included

- NTP Software Storage Investigator™
- NTP Software Storage Help Site™
- NTP Software QFS® Email Templates

## Supported Platforms

### NTP Software QFS® for NAS

- Dell™ PowerVault™ Edition
- EMC Celerra Edition
- NetApp FAS Edition
- HP NAS Edition
- IBM® NSeries Edition

### NTP Software QFS® for SAN

- EMC CLARiiON Edition
- EMC Symmetrix Edition
- Windows® Host Edition
- Windows® Host 64-Bit AMD
- Windows® Host 64-Bit Intel

### NTP Software QFS® for DAS

- Windows® Host
- Windows® Host 64-Bit AMD
- Windows® Host 64-Bit Intel

NTP Software supports additional platforms not listed above. To find out if your platform is supported, contact one of our sales representatives today.
